Testing protocol

- All incoming people – Bhutanese or foreigners
- Tested for RT- PCR on 3rd ,7th and last 22nd day after reaching in the country

New normal

Hand washing

Face mask

HOW TO BE A FACEMASK HERO

- ✓ Wash your hands before putting on your mask
- ✓ Make sure it fits nicely over your nose and under your chin
- ✓ Minimize gaps that let air in on the sides and under your eyes
- ✓ Follow the most updated advice from government and health professionals
- ✓ Wear your mask every time you leave your home
- ✓ Only use YOUR OWN mask, keep it clean and safe

Don't be a Facemask Clown!

Don't remove one strap and leave your mask hanging from one ear.

Don't pull the mask under your nose. What are you thinking?

Are you trying to protect your chin? Don't wear your mask on your chin.

Don't wear your mask as a hat no matter how great you think it looks.

"The 6 common new normal preventive measures to keep you safe"

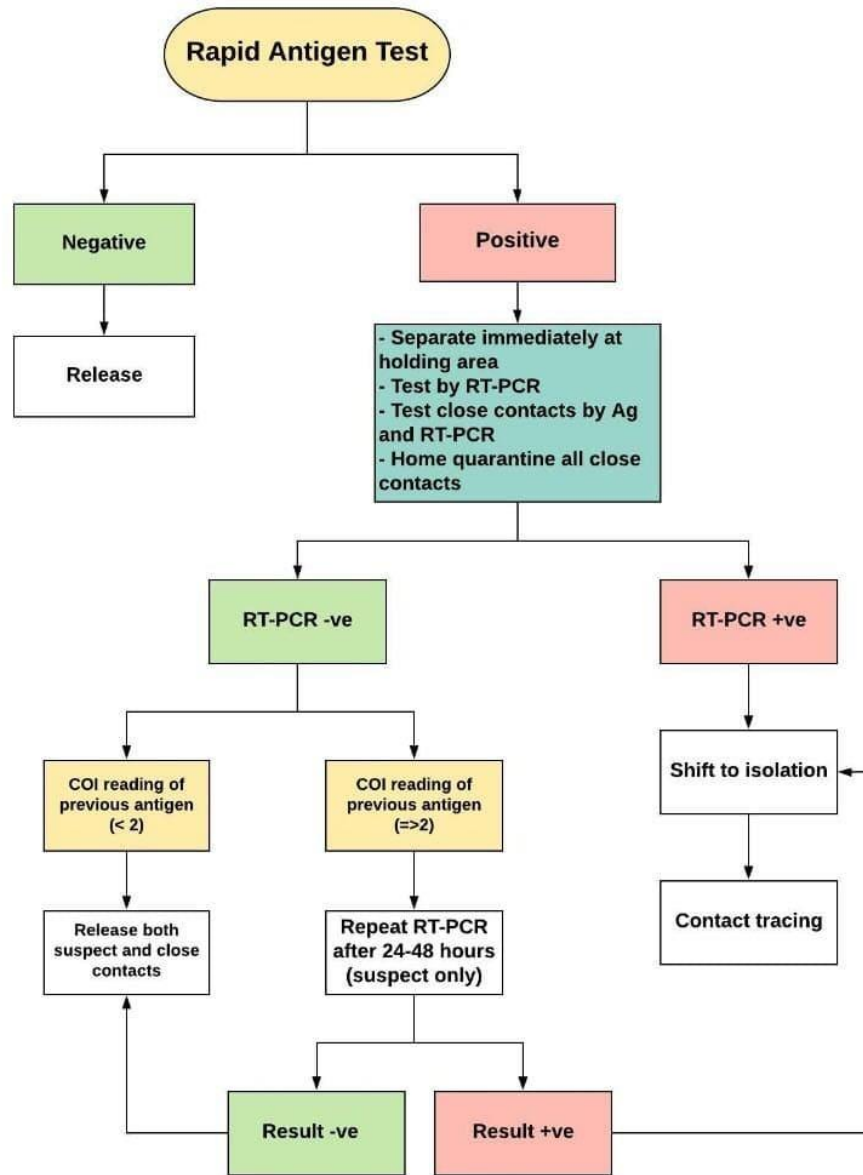

-  Stay at home and come out only when necessary
-  Mandatory use of face mask at all times
-  Maintain physical distance of at least 1 meter from others.
-  Use Druk Trace App or register into visitor's logbook
-  Wash your hands with soap and water for at least 20 sec/use hand sanitizer
-  If you have flu-like symptoms, visit Flu Clinics
